## **ALLEY CREEK**

### **Queens, New York**

#### **Section 206 Environmental Restoration**

---

#### **FACT SHEET**

---

**DESCRIPTION:** Alley Creek, situated in Queens, New York, is fed by glacial kettle ponds in upper Alley Pond Park, and by storm water drainage from the adjacent Cross Island Parkway and nearby neighborhoods. The Creek flows north into Little Neck Bay through Alley Pond. The construction and heavy use of the Cross Island Parkway to the west, and the continued residential construction within Douglaston to the east, have heavily impacted Alley Creek. A major goal of this potential project would be to control non-point source pollution and erosion into Alley Pond and Long Island Sound.

**AUTHORIZATION:** Section 206, Water Resources Development Act of 1996, as amended

**STATUS:** A Preliminary Restoration Plan (PRP) will be initiated in Fiscal Year 2004.

#### **PROJECT COST:**

Estimated Federal Cost	\$ 10,000
Estimated Non-Federal Cost	<u>0</u>
Total	\$ 10,000
